To Whom It May Concern,

It's my pleasure to offer this letter of recommendation related to the structural performance of Orange and Blue Construction on our Modera River House project located in Miami, FL.

Our construction team first and foremost appreciated the vigilance in keeping the work safe. Maintaining a safe work environment was critical on this project given the tight working space and small areas of available access. Orange and Blue Construction was able to safely install the foundation, slab on grade, columns, shear walls, 2<sup>nd</sup> level conventional transfer slab, masonry, tunnel form walls/decks and rooftop swimming pool in the construction of the 8-story building while using a tower crane.

Other areas of exceptional performance by Orange and Blue Construction included adherence to the project schedule, coordination with other trades, timely RFI creation and organized office administration.

Orange and Blue Construction exceeded our expectations on this challenging project. I personally would recommend Orange and Blue Construction to anyone considering using them as their concrete shell contractor.

Sincerely,

A handwritten signature in blue ink, appearing to read "Frank Navia", is written over the word "Sincerely,".

Frank Navia  
Regional Vice President of Construction
